Being a web developer I enjoy building rich interactive web apps using latest technologies. I strive to make web a beautiful place with every line of code so I want to work in an organization with dynamic and professional team, where I can use my capability to achieve the organizational goal and to grow personally as well as professionally.

Experience

I am having more than 9 years of relevant experience in web development.

2017-June - Present

Lead UI Developer
Conduent, Inc.
- Working with core implementation team to create the next generation versions of currently available products using more advanced technologies that enhances the product performance and efficiency.
- Creating the front end using AngularJS and React frameworks that integrates directly with Rest Api to fetch and post data over web applications.
- Leading a small team of 4 developers that works directly with Business analyst team to gather client requirements/designs and develop the same after deep analysis with POCs.
- Along with the developments, also reviewing the code for team and running the reports on Sonar Lint.

2016 - Nov - 2017 - Jun

Senior Engineer - Software Development
Landis + Gyr LTD.
- Worked as an individual contributor in my team for UI related work on smart meter application solution.
- Architect two mini portals with thirdparty integration to smart meter application web portal.
- Worked directly with client teams to understand the requirements and delivered the same before time with quality code.

2014 - Aug - 2016 - Nov

UI Developer
- As a team member of UI team worked on US healthcare portals to provide service to our customers with very good customer experience.
- Worked greatly on web accessibility tools and technology for US government portals with 508 compliance.
- Created next level user interactive web applications for demo to bid new customers in the market.

2011 - Oct - 2014 - Aug

Software Developer
Cognizant Technology Solutions and ACS A Xerox Company
- Started my career as a part of UI development team to work on providing web solutions to US Healthcare/Savings and Retirement domains.
- Worked to create web pages from PSDs and make them responsive as per page layout.
- Individually handled Verizon client to create web pages from scratch for all domains with successful Annual Enrollment period.

Education
